

Worksheet

Interim

Documentation of Land Use Plan Conformance and NEPA Adequacy (DNA)

Uncompahgre Field Office, Colorado

November 2006 Oil & Gas Lease Sale

CO-150-2006-41 DNA (FO numbering system)

U.S. Department of the Interior Bureau of Land Management

Note: This Worksheet is to be completed consistent with the policies stated in the Instruction Memorandum entitled, "Documentation of Land Use Plan Conformance and National Environmental Policy Act (NEPA) Adequacy" transmitting this Worksheet and the "Guidelines for using the DNA Worksheet", located at the end of the Worksheet.

A. Describe the Proposed Action

GGNCA RMP - Offer for oil and gas leasing parcel 3628 listed in Exhibit A, within the Uncompahgre Field Office (UFO). Legal descriptions and stipulations are attached in Exhibit A to this DNA document.

SJSM RMP - Offer for oil and gas leasing parcels 3647, 3830, 3831, 3833, 3752, 3753, 3770-3777, 3681, 3684, 3673, 3685, 3686, 3687 and 3654 listed in Exhibit A, within the UFO (see Exhibit A for legal descriptions and stipulations).

UB RMP - Offer for oil and gas leasing parcel 3627 listed in Exhibit A, within the Uncompahgre Field Office (UFO). Legal descriptions and stipulations are attached in Appendix A to this DNA document.

B. Land Use Plan (LUP) Conformance

LUP Name* <u>Gunnison Gorge NCA RMP and ROD</u>	Date Approved <u>11/2004</u>
Other document _____	Date Approved _____
Other document _____	Date Approved _____

LUP Name* <u>San Juan/San Miguel RMP</u>	Date Approved <u>12/1984</u>
Other document <u>San Juan/San Miguel RMP ROD</u>	Date Approved <u>12/1985</u>
Other document <u>San Juan/San Miguel Amendment, ACEC & SRMA</u>	Date Approved <u>2/1993</u>

LUP Name* <u>Uncompahgre Basin RMP</u>	Date Approved <u>9/1988</u>
Other document <u>Uncompahgre Basin RMP ROD</u>	Date Approved <u>7/1989</u>
Other document _____	Date Approved _____

* List applicable LUPs (e.g., Resource Management Plans and activity, project, management, or program plans, or applicable amendments thereto)

☒ The proposed action is in conformance with the applicable LUPs as maintained because it is specifically provided for in the following LUP decisions:

GGNCA RMP- The Gunnison Gorge National Conservation Planning Area RMP and Record of Decision show the areas of the proposed action are in Management Unit 6 which provides for multiple use under common management with limited off highway and mechanized travel restrictions. The RMP, page 2-93 (MIN 6-1), states that the oil and gas estate in the unit will be available for leasing subject to special stipulations.

SJSM RMP - The San Juan/San Miguel RMP and Record of Decision show the areas of the proposed action are in the following emphasis areas: Livestock, Wildlife, Disposal, Mineral Development, Cultural

Resources and General Resource Management. The ROD, page 17, states “As a general rule, public land is available for oil and gas leasing. In many areas, oil and gas leases will be issued without special lease stipulations. In highly sensitive areas, where special stipulations or information notices are not sufficient to protect important surface resource values, no surface occupancy stipulations will be implemented. Stipulations and information notices are located in Appendix Two.” In addition, the Conditions of Approval and Lease Stipulations for some of the lands in the Proposed action are listed in Appendices D and E of the Colorado Oil and Gas Leasing Final EIS.

UB RMP - The Uncompahgre Basin Record of Decision contains the following decisions in the area of the proposed action. Management Unit 16 (page 28) - General Land Uses, Federal oil and gas estate will be open to leasing with seasonal restrictions, if applicable.

☐ The proposed action is in conformance with the LUP, even though it is not specifically provided for, because it is clearly consistent with the following LUP decisions (objectives, terms, and conditions):

C. Identify applicable NEPA documents and other related documents that cover the proposed action.

List by name and date all applicable NEPA documents that cover the proposed action.

In addition to the resource management plans mentioned above, the following documents apply:
Colorado Oil and Gas Leasing and Development Final EIS, January, 1991, which amended the SJSM RMP for oil and gas leasing.
SJSM RMP Amendment, ACEC and SRMA, February, 1993
Montrose District Wilderness Environmental Impact Statement, September 1990.

List by name and date other documentation relevant to the proposed action (e.g., biological assessment, biological opinion, watershed assessment, allotment evaluation, and monitoring report).
A biological opinion for the Gunnison Gorge NCA plan was issued by the U.S. Fish and Wildlife Service on March 11, 2004

D. NEPA Adequacy Criteria

1. Is the current proposed action substantially the same action (or is a part of that action) as previously analyzed? Is the current proposed action located at a site specifically analyzed in an existing document?

Documentation of answer and explanation:

GGNCA RMP - Yes, the current proposed action is substantially the same action as previously analyzed in the Gunnison Gorge National Conservation Area RMP. In addition, according to the Tenth Circuit Court of Appeals, site specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to Drill is the first useful point at which a site specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10th Cir., April 17, 1987). In addition, the Interior Board of Land Appeals has decided that, “BLM is not required to undertake a site-specific environmental review prior to issuing an oil and gas lease when it previously

analyzed the environmental consequences of leasing the land...” (Colorado Environmental Coalition Et.Al., IBLA 96-243, decided June 10, 1999).

SJSM RMP - Yes, the current proposed action is substantially the same action as previously analyzed in the SJ/SM RPM and the Colorado Oil and Gas Final EIS. In addition, according to the Tenth Circuit Court of Appeals, site specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to Drill is the first useful point at which a site specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10th Cir., April 17, 1987). In addition, the Interior Board of Land Appeals has decided that, “BLM is not required to undertake a site-specific environmental review prior to issuing an oil and gas lease when it previously analyzed the environmental consequences of leasing the land...” (Colorado Environmental Coalition Et.Al., IBLA 96-243, decided June 10, 1999).

UB RMP - Yes, the current proposed action is substantially the same action as previously analyzed in the UB RPM. In addition, according to the Tenth Circuit Court of Appeals, site specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to Drill is the first useful point at which a site specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10th Cir., April 17, 1987). In addition, the Interior Board of Land Appeals has decided that, “BLM is not required to undertake a site-specific environmental review prior to issuing an oil and gas lease when it previously analyzed the environmental consequences of leasing the land...” (Colorado Environmental Coalition Et.Al., IBLA 96-243, decided June 10, 1999).

2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the current proposed action, given current environmental concerns, interests, and resource values?

Documentation of answer and explanation:

GGNCA RMP - There were four alternatives analyzed in the Gunnison Gorge National Conservation Area Resource Management Plan. Alternative A’s objectives were the continuation of current management (no action). Alternative B’s objectives were to focus on conserving natural values and improving and enhancing land health conditions. Alternative C’s objectives were to provide a greater diversity of uses, additional developed facilities and greater diversity outside of the Wilderness. Alternative D was the preferred alternative which incorporated some of the objectives from the other three alternatives to maximize diversity of multiple uses while meeting or exceeding land health standards.

SJSM RMP - There were three alternatives analyzed in the Colorado Oil and Gas Final Leasing EIS. The Proposed Action Alternative is to lease oil and gas with Standard Terms and Conditions and additional leasing stipulations to further protect resources and values beyond the level of protection in the Standard Terms and Conditions. The Continuation of Present Management Alternative would lease oil and gas resources with Standard Terms and Conditions, and the stipulations currently in use. The Standard Terms and Conditions Alternative consists of leasing for oil and gas with only the standard terms and conditions. These alternatives provide a broad range of alternatives which, in our judgment, adequately address current environmental concerns, interests and resource values.

UB RMP - The four alternatives analyzed in the RMP included Continuation of Current Management Alternative, the Production Alternative, the Conservation Alternative, and the Preferred Alternative. These provided a broad range of alternatives which, in our judgment, adequately address current environmental concerns, interests and resource values.

3. Is the existing analysis valid in light of any new information or circumstances?

Documentation of answer and explanation:

SJSM RMP - We have reviewed each parcel and determined that leasing would not adversely impact maintaining or achieving public land health. Parcels 3647, 3753, 3830, and 3831 are in the Norwood Unit Landscape Health Assessment (LHA), scheduled for completion in FY2006. The Mesa Creek LHA, covering all or portions of Parcels 3673, 3681, 3684, 3685, 3774, 3775, 3776, 3777, was completed in 2004. These LHA's were not specifically designed to assess past, current or anticipated effects from oil and gas activities, but will serve as a general baseline for landscape health. The LHAs do not apply to the parcels where the surface is private.

BLM Colorado is in the process of collecting additional information in order to conduct land use plan amendments to protect a variety of endangered, or threatened species as well as species proposed for listing under the Endangered Species Act (ESA), species which are candidates for listing under the ESA, or BLM sensitive species. Parcel numbers 3753, 3774, and 3777 fall partially within one of the following Colorado Natural Heritage Program Potential Conservation Areas (PCA): Naturita South PCA, and Uravan West PCA. These PCA's are considered important representative sites for high biodiversity significance due to the presence of high quality riparian communities, rare plants and animals, or excellent examples of upland plant communities. Portions of these parcels are also considered to be of high biodiversity significance by San Miguel County. These PCA's were identified after completion of the San Juan/San Miguel RMP and its amendments, and are currently open to oil and gas leasing with standard stipulations. When exploration and development occurs in these PCA's, onsite inventories would be conducted for sensitive species, and impacts would be avoided or mitigated. We have reviewed the above new information and concluded there is no significant new information which affects the existing analysis of the RMP.

All or portions of parcels 3647, 3830, 3831, 3753, 3774, 3776, 3681, 3684, 3673, 3685, 3686, 3687 and 3654 are under review for Wild and Scenic River analysis and should be deferred until the analysis is completed.

All or portions of parcels 3770-3777 are within the Department of Energy lands withdrawn for uranium leasing. The parcels should be leased with the stipulations recommended by the DOE in their letter dated 6/8/2006.

Parcel 3654 is partially located in the Sewemup Mesa Citizens Wilderness Proposal area. The lease parcel lies south of the Sewemup Mesa WSA. The WSA was evaluated in the November, 1980 Intensive Wilderness Inventory and was determined to have wilderness values. No new information that would require modification of the analyses has been received. Additional interest group opinions regarding wilderness characteristics have been provided since the RMP. Wilderness EIS was completed. This additional information was adequately analyzed for leasing actions. Based on the 1979 BLM intensive wilderness inventory, the portions of parcel 3654 within the CWP do not contain these identified values. It was determined that these lands as well as others were not included due to the presence of roads, ways and imprints resulting from mineral exploration which reduced the naturalness of these lands.

GGNCA RMP - The Landscape Health Assessment (LHA) for parcel 3628 is the Gunnison Gorge Unit; it was completed in 2001. The LHA does not apply to the parcels where the surface is private. This LHA was not specifically designed to assess past, current or anticipated effects from oil and gas activities, but it will serve as a general baseline for landscape health. A very small portion of this parcel falls within the Colorado Natural Heritage Program's Lawhead Gulch Potential Conservation Area, set aside for its very high biodiversity significance, primarily habitat for the Endangered clay-loving wild buckwheat. When exploration and development occurs in these PCA's, onsite inventories would be conducted for sensitive species, and impacts would be avoided or mitigated. We have reviewed the above new information and concluded there is no significant new information which affects the existing analysis of the RMP.

UB RMP - We have reviewed the parcel and determined that leasing would not adversely impact maintaining or achieving public land health. The North Fork LHA is currently underway, and parcel 3627 falls within this LHA area, scheduled for completion in FY07. The LHA does not apply to parcels

where the surface is private. At least two thirds of this parcel falls within the Colorado Natural Heritage Program's Hotchkiss Hills Potential Conservation Area. This area is considered to have very high biodiversity significance as habitat for the Colorado desert parsley. When exploration and development occurs in these PCA's, onsite inventories would be conducted for sensitive species, and impacts would be avoided or mitigated. Portions of parcel 3627 are under Wild and Scenic River analysis and should be deferred until the analysis is completed.

4. Do the methodology and analytical approach used in the existing NEPA document(s) continue to be appropriate for the current proposed action?

Documentation of answer and explanation:

The methodology and analytical approach used in the UB RMP (as amended), GGNCA RMP (as maintained) and the SJSM RMP (as amended) is appropriate for the current proposed action.

5. Are the direct and indirect impacts of the current proposed action substantially unchanged from those identified in the existing NEPA document(s)? Does the existing NEPA document analyze site-specific impacts related to the current proposed action?

Documentation of answer and explanation:

GGNCA RMP - The impacts of the preferred alternative, Alternative D, are described in the Proposed RMP and EIS in Chapter 5 (page 5-21). There are no differences that may result from leasing the parcels listed in the proposed action above. According to the Tenth Circuit Court of Appeals, site specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to Drill is the first useful point at which a site specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10th Cir., April 17, 1987). In addition, the Interior Board of Land Appeals has decided that "BLM is not required to undertake a site-specific environmental review prior to issuing an oil and gas lease when it previously analyzed the environmental consequences of leasing the land..." (Colorado Environmental Coalition Et.Al., IBLA 96-243, decided June 10, 1999).

SJSM RMP - The Final Colorado Oil and Gas EIS, which amended this RMP, discusses the impacts of the Preferred Alternative on page 4-25 and the final SJ/SM RMP/EIS discusses the impacts on page 63-66. There are no differences that may result from leasing the parcels listed in the proposed action above. According to the Tenth Circuit Court of Appeals, site specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to Drill is the first useful point at which a site specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10th Cir., April 17, 1987). In addition, the Interior Board of Land Appeals has decided that "BLM is not required to undertake a site-specific environmental review prior to issuing an oil and gas lease when it previously analyzed the environmental consequences of leasing the land..." (Colorado Environmental Coalition Et.Al., IBLA 96-243, decided June 10, 1999).

UB RMP - The Final UB RMP discusses the impacts of the Preferred Alternative on page 172. There are no differences that may result from leasing the parcels listed in the proposed action above. According to the Tenth Circuit Court of Appeals, site specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to Drill is the first useful point at which a site specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10th Cir., April 17, 1987). In addition, the Interior Board of Land Appeals has decided that "BLM is not required to undertake a site-specific environmental review prior to issuing an oil and gas lease when it previously analyzed the environmental consequences of leasing the land..." (Colorado Environmental Coalition Et.Al., IBLA 96-243, decided June 10, 1999).

6. Are the cumulative impacts that would result from implementation of the current proposed action substantially unchanged from those analyzed in the existing NEPA document(s)?

Documentation of answer and explanation:

GGNCA RMP - The cumulative impacts remain substantially unchanged from those described in the GGNCA RMP/EIS. The RMP/EIS projected 10 wells over the life of the plan, with an estimated total of 10 to 30 acres of disturbance. To date, there has been no surface disturbance on public lands and added to the past, present and reasonably foreseeable actions of BLM and others the impact prediction remains accurate. Implementing the proposed action will not change the cumulative impact analysis.

SJSM RMP - The cumulative impacts remain substantially unchanged from those described in the Colorado Oil and Gas Final Leasing EIS on page 4-30. The EIS projected the impacts over a 20-year period. The cumulative surface disturbance is shown on Table 4.5, page 4-31. To date, the amount of surface disturbance on public land has been less than predicted, and added to the past, present and reasonably foreseeable actions of BLM and others the impact prediction remains accurate. Implementing the proposed action will not change the cumulative impact analysis.

UB RMP - The cumulative impacts remain substantially unchanged from those described in the Uncompahgre Basin RMP/EIS on page 174. The RMP/EIS analyzes projected 10 wells per year over a 30-year period. Considering reclaimed areas and new disturbance in an average year surface disturbance would be 30 acres. To date, the amount of surface disturbance on public land has been much less than predicted, and added to the past, present and reasonably foreseeable actions of BLM and others the impact prediction remains accurate. Implementing the proposed action will not change the cumulative impact analysis.

7. Are the public involvement and interagency review associated with existing NEPA document(s) adequate for the current proposed action?

Documentation of answer and explanation:

GGNCA RMP - The public involvement and interagency review conducted for the Gunnison Gorge NCA RMP and EIS consisted of notification in the Federal Register, open houses, scoping meetings, citizen/agency focus group, newsletters, news releases and a 90-day public comment period. See the Proposed RMP/EIS (Jan, 2004 – Chapter 6) for a listing of the federal, state and local agencies contacted and written comments received. In the area of the proposed action there are no new issues, concerns or controversies that would cause the leasing decisions to be reconsidered.

SJSM RMP - The public involvement and interagency review conducted for the SJ/SM RMP/EIS, SJ/SM RMP amendment for the San Miguel River ACEC/SRMA, and the Colorado Oil and Gas Final leasing EIS consisted of notification in the Federal Register, public hearings, public meetings, scoping meetings, news releases and a 90-day public comment period. See the SJ/SM Final RMP/EIS and the Colorado Oil and Gas Final leasing EIS for a listing of the federal, state and local agencies contacted. In the area of the proposed action there are no new issues, concerns or controversies that would cause the leasing decisions to be reconsidered.

UB RMP - The public involvement and interagency review conducted for the Uncompahgre Basin RMP/EIS consisted of notification in the Federal Register, public hearings, public meetings, scoping meetings, news releases and a 90-day public comment period. Fifty-one persons testified at the public hearings. One hundred and seventy-three persons, groups or agencies submitted written comments. See the Uncompahgre Basin Final RMP/EIS, pages 7 and 8, for a listing of the federal, state and local agencies contacted. In the area of the proposed action there are no new issues, concerns or controversies that would cause the leasing decisions to be reconsidered.

E. Interdisciplinary Analysis: Identify those team members conducting or participating in the NEPA analysis and preparation of this worksheet.

<u>Name</u>	<u>Title</u>
Lynn Lewis	Geologist
Jim Ferguson	Wildlife Biologist
Karen Tucker	NCA Manager
Glade Hadden	Archaeologist

F. Remarks:

Cultural Resources: None known. Site specific surveys, evaluation and mitigation will be completed prior to the issuance of any permit.

Native American Religious Concerns: None known. Further tribal consultation will occur prior to the issuance of any permit.

Conclusion CO-150-2006-41-DNA

☒

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the NEPA documentation fully covers the proposed action and constitutes BLM's compliance with the requirements of NEPA considering that an additional, site specific NEPA document will be prepared before any action capable of causing an environmental impact is taken.

☐

Based on the review documented above, I conclude that the criteria have **NOT** been met on portions or all of the following parcels: 3627, 3628, 3647, 3830, 3831, 3753, 3774, 3776, 3681, 3684, 3673, 3685, 3686, 3687 and 3654 listed in Appendix A. The parcels require stipulation or Wild and Scenic River reviews.

Note: If you found that one or more of these criteria is not met, you will not be able to check this box.

/s/ Barbara Sharrow

Barbara Sharrow, Uncompahgre Field Manager
Signature of the Responsible Official

8/24/2006
Date

Note: The signed Conclusion on this Worksheet is part of an interim step in the BLM's internal decision process and does not constitute an appealable decision.

Attached: Appendix A – Parcel Description and Stipulations

APPENDIX A

THE FOLLOWING PUBLIC DOMAIN LANDS ARE SUBJECT TO FILINGS IN THE MANNER SPECIFIED IN THE APPLICABLE PORTIONS OF THE REGULATIONS IN 43 CFR, SUBPART 3120.

PARCEL ID: 3627 SERIAL #:

T. 0150S., R 0930W., 6TH PM
Sec. 1: NESE,S2SE;
~~Sec. 10: NE;~~

Delta County
Colorado 280.000 Acres

All lands are subject to Exhibit CO-34 to alert lessee of potential habitat for a threatened, endangered, candidate, or other special status plant or animal.

All lands are subject to Exhibit CO-39 to protect cultural resources.

The following lands are subject to Exhibit UB-01 to protect highly erodible and/or saline soil areas:

T. 0150S., R 0930W., 6TH PM
Sec. 1: SWSE,E2SE
